

## Polar Weather Report: Part 5

Name \_\_\_\_\_

Now, you'll gather all of your information about the temperature in the North and South Poles and report on it for the KBRD audience.

This report could take the form of:

- a brochure
- a presentation
- a video

Or make anything else that you and your teacher agree upon.

Be sure to include the information you've found or calculated throughout the project:

- monthly temperatures
- your graph
- the range, highs, and lows
- the seasonal temperatures

Highlight the most interesting information.

You may also add other fun facts about the poles:

- precipitation
- wildlife
- things to do or see
- hours of sunlight
- how to get to the poles

Try to create something that only you would come up with!
