

## Fraction Equivalence: Part 1

Name \_\_\_\_\_

How many solutions can you find using the digits 0-9 once each?

The diagram shows a fraction equivalence problem. On the left, there is a fraction represented by a 2x2 grid of gray boxes with a horizontal line between the two boxes. To the right of this grid is an equals sign. To the right of the equals sign is another fraction represented by a 2x2 grid of gray boxes with a horizontal line between the two boxes.
